1st October 2015

Dear Customer,

Re: Quality Assurance and HACCP Certification

Specialised Breeders Australia, suppliers of the Hy-Line breed of chickens in Australia, is a Quality Certified Company audited by SAI Global Assurance Services to comply with the AS/NZS ISO 9001:2008 and CAC HACCP VER:2003 Food Safety Management Systems.

Hy-Line Layers Australia's day-old chicks are hatched, processed and dispatched from a dedicated hatchery near Bendigo in Victoria.

An important critical control point in the Food Safety Management program is monitoring of flocks and hatcheries for Salmonella bacteria. Veterinarian approved swabbing and sampling of sensitive locations across our farms and hatcheries is performed on a regular basis.

Specialised Breeders Australia endeavours to produce day-old chicks that are free from all Salmonella species. All testing conducted within the last 12 months at our farms and hatcheries have recorded negative results for both *Salmonella typhimurium* and *Salmonella enteritidis*.

Hy-Line Layers is committed to a continuous improvement program to ensure customer requirements are satisfied into the future.

Yours faithfully,

Geoff Baker
Quality Manager
